Subject: Per-and polyfluoroalkyl substances (PFAS)

Västerås, April 2, 2026

Per-and polyfluoroalkyl substances (PFAS), sometimes called "forever chemicals," is a group of thousands of substances widely used in many industries. For example, commonly known PFAS include: • PFOA (perfluorooctanoic acid) and PFOS (perfluorooctane sulfonic acid) • PFHxA (perfluorohexanoic acid) and PFH[x]S (perfluorohexane sulfonate/perfluorohexane sulfonic acid) • PTFE (polytetrafluoroethylene) and other fluoropolymers • Thousands of other chemicals Due to growing awareness of health and environmental concerns, PFAS are facing increasing scrutiny worldwide. According to the current best knowledge and according to the information provided by suppliers, ABB states that manufactured Pilot devices and related accessories comply contains Per-and polyfluoroalkyl substances (PFAS) as illustrated in ABB document 2CMT2025-006835. No chemical analysis nor other similar testing has been conducted.

PFAS in Pilot devices

Compact Range, Enclosures and Assembled Stations, Modular Metal Range, Modular Plastic Range, Signal Towers and Beacons, Emergency Stops and Pilot Devices and related accessories

Pilot devices

- 1-Propene, 1,1,2,3,3,3-hexafluoro-, oxidized, polymd. - PFPE (CAS 69991-67-9)
- Oil used in Compct range
